

MARK S. SCHLISSEL

Professor

UNIVERSITY OF MICHIGAN

April 6, 2022

Board of Regents
University of Michigan

I apologize to the Regents and the University for the poor judgment I exercised by engaging in a close personal relationship with a university employee. The relationship was entirely consensual, was never physical, and did not involve the inappropriate spending of university resources. But in a time when we have been trying to strengthen the bonds of trust at the University, it is particularly important that campus leaders avoid even an appearance of impropriety. I am also sorry for any disruption this has caused to the conduct of U-M's important mission.

Sincerely,

Mark Schlissel M.D., Ph.D.

Professor of Microbiology & Immunology
Professor of Molecular Cellular & Developmental Biology
Professor of Medicine
